ROLES: Emily Blunt

BLUNT IS SO DOWN TO EARTH

By FRANK DURHAM

BEAUTY Emily Blunt is glad to have brought her movie roles back down to Earth after her recent sci-fi romp with Tom Cruise.

The 31-year-old star says that while she loved working with Tom on *The Edge of Tomorrow*, she's not looking for more out-of-this-world roles.

"It was great for that one time but I don't know if I will be chopping up aliens again for a little bit," says Emily.

"I have *Into the Woods* coming up and some other projects I'm really excited about but nothing else like that one just yet."
